

Dzianis Shvets

Software Engineer

Stamford, CT - Email me on Indeed: [indeed.com/r/Dzianis-Shvets/1d3a1d93fd425adb](https://www.indeed.com/r/Dzianis-Shvets/1d3a1d93fd425adb)

Innovation-driven IT professional with diverse experience in developing software, designing data processing applications, and customizing new functionality. Proven expertise in translating client requirements to successfully align development results within expectations. Accomplished in delivering long-term resolutions, navigating programming challenges, and resolving issues by designing and implementing the latest technologies. Successful in following the Software Development Life Cycle (SDLC), Software Test Life Cycle (STLC), and defect life cycle management. Permanent US resident with a green card. Fluent in Russian with strong proficiency in English.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

WORK EXPERIENCE

Android developer

Independent Developer - 2012 to January 2017

Creation of my own applications

The following 20 applications have been completed fully by myself (idea, idea analysis, design, programming, testing, launch, maintain, promotion):

<https://play.google.com/store/apps/developer?id=DSD&hl=en>

<https://play.google.com/store/apps/developer?id=DSN+Inc.>

In "Fitness trainer", "Pilates" - I used 3d animation (Blender), Photoshop

"Woman diary (calendar)" - more than 3.5 million downloads

- Designed the screens using MVC pattern for the application with Eclipse IDE.
- Designed the application from scratch.
- Implemented Fragments, Activities.
- Developed different features for the application.
- Worked on linear, frame and relative layouts.
- Implemented Notification Manager to display updates on the notification bar.
- Implementing Broadcast Receivers for Android.
- Utilized GPS location-based services and Google Maps API to enable Google map search for locations in close proximity.
- Enabled GPS/Wi-Fi to detect user location from where to begin searching.
- Refactored the code base to optimize start-up time and memory usage.
- Integral in internationalizing of the app to support different languages.
- Key resource for layout and UI work utilizing xml, Views, Webview, ListView, Menu Item, Activities, Fragments, Frame, Animations, Notifications, Push Notifications etc.
- Integrated Google map v1 and v2 to load the store locations on map.
- Used web view to show HTML5 pages.
- Tested the app across different versions of Android and different android phones to assure quality and performance.
