## WEB APPLICATION PROJECT DETAILS:

1) Project Title: Online Vehicle Workshop

Description: This project E-Workshop is an online application. I have created a website regarding the service appointment, sell /Buy second hand vehicles, Spare parts, etc. E-Workshop application is useful for automobile workshop customers and its employees.

Working Areas: PHP 5.2, MySQL, Windows-7, Xampp Apache Server

Team Size: 1

6) Project Title: Online Report Management System of a Diagnostic Lab

Description: This is an online application developed using Php language. I have created a website regarding the reports of the clients that are put on the website along with allowable references ranges in a printable format. In this web application, the client is supposed to register on the website. A client when wants to get some test done, s/he login to their account and select the test to be done. After that the client will make payment online and the receipt of the invoice will be given to client. Finally, the client has to enter that receipt number to see the report.

Working Areas: PHP 5.2, MySQL, Windows-7, Xampp Apache Server

Team Size: 2

7) Project Title: Online Shopping System

Description: The main goal of this project was to create a online shopping, which allows customers to shop and purchase the products online. Moreover, the project is also designed in such a way it lets managers manage the products information online. The online store sells many products. Customers can orders products, and they will be contacted to further process the orders. Admin can add more categories and sub categories. Admin can view products add new products modify existing products.

Working Areas: PHP 5.2, MySql, Windows-7, Xampp Apache Server

Team Size: 1
