

Justin Hershberger

Web Developer - Space Dynamics Lab

Logan, UT - Email me on Indeed: [indeed.com/r/Justin-Hershberger/860c9179f4d12509](https://www.indeed.com/r/Justin-Hershberger/860c9179f4d12509)

• I'm a hardworking, eager student preparing to graduate in Spring 2017. I'm looking for an opportunity to find a career opportunity that allows me to learn, prosper, interact with team members, and overcome challenges. I want to gain a deeper understanding of computer science as well as make relationships along the way. If I can't understand or don't know the solution to a problem, I will figure it out and learn from that experience. I look forward to any opportunity to become an asset to a great company.

WORK EXPERIENCE

Web Developer

Space Dynamics Lab - Logan, UT - 2016 to Present

Logan, Utah

Enterprise Application Support Team 2016 - Current

- I get experience in both frontend and backend parts of the stack. We use a PostgreSQL database, OpenAcs server, tcl as our server side language, JavaScript, HTML5, and CSS3. We use jira as our agile work environment and have scrum meetings frequently. Git is our source control. I also spend time in a unix terminal frequently because we remotely connect to our server. I have gained a lot of quality experience working here. I can provide more information about my experience here, if wanted.
