WORK EXPERIENCE

Android Developer

LifeFitness - Franklin Park, IL - October 2015 to Present

Building new UI features based on Android for LifeFitness cross platform consoles. New UI will be featured in upcoming IHRSA 2016 conference event. LifeFitness UI architecture based on MVC design pattern with dependency injection.

Android Developer

American Hospital Association - Chicago, IL - April 2015 to July 2015

AHA Action Center Application

Originally hired to port the existing AHA 2015 Annual conference app from iOS over to Android for the 2015 American Hospital Association event kick off conference and season.

HPOE Magazine Application

Designed and developed current AHA HPOE (Hospitals in Pursuit of Excellence) for Android. Application contains bookmarking of articles as well as video playback and PDF viewing/caching.

Both applications make use of dependency injection using Dagger, Otto and Picasso from Square. AHA Action Center is currently in the app store with HPOE Magazine soon to follow.
