Willing to relocate: Anywhere

Sponsorship required to work in the US

### WORK EXPERIENCE

#### Web Developer

Talino Digital Asia Inc. - Negros Oriental - November 2015 to Present

I am a self-taught developer, learning how to code from looking at websites online and actually getting stuck in to building things. I have a strong grasp at what I'm doing and always try to out-do my last project.

To cut to the chase, I design good user interfaces and can translate those into semantic, well structured websites. I'm an honest individual who is very helpful and likes to build strong relationships with the people I work with.

#### Typesetter

SPi Global Dumaguete - Negros Oriental - July 2012 to November 2015

I was one of the first batch who got hired to work for the Laserwords account which is one of the pioneers and most successful publishing BPO companies in India.

I joined the company to promote strong support of company's mission and vision, and excels in contributing to the company's goals.

Effectively formulates strategies, tactics, and action plans to drive successful results. Develops successful strategies such as "having a common goal" that led to clients being happy with our work.

Successes included growth of the team in the Philippines.
