WORK EXPERIENCE

Web Developer

FBD Frozen   -   San Antonio, TX - September 2015 to July 2016

Collaborated with a software developer to create and debug internal applications.
Edited both Android and iOS versions of an application to compress images captured in the app.
Created a web application using React.js for employees to sign in and track the hours they worked at a sister company for the accounting department.
Created a web application in React.js to pull error codes and dates from a MySQL database and display them in a way that was easier to understand for management.
Modified an existing human resources application created with CakePHP and managed employee access to some features.
Modified existing company website with new content.
Worked closely with management to create a macro in VBA (Visual Basics for Applications) to improve their inventory ordering process.
Created functions and procedures for applications to interact with MySQL servers.
Worked in a Linux environment across multiple servers.
Set up mobile devices given to employees and managed them using Cisco Meraki software.
Managed large MySQL databases in MySQL Manager and performed minor maintenance.
Experienced with version control and git repositories.
Distributed different versions of a machine monitoring application specific to clients in Singapore and Australia.

Web Developer

Waking Girl Designs   -   San Antonio, TX - June 2015 to September 2015

Worked with a Web Designer and Graphical Designers to design and market small businesses in the Nevada area.
Regularly updated client websites with content, my responsibilities included staying in contact with clients through email to ensure their needs were met.
Updated and managed multiple clients social media profiles, making posts and writing blogs on behalf of their owners.
Helped design website layouts and edited CSS style sheets.
