Christopher Chang

FIX Analyst at FolioDynamix

Education

New York University
BA, Business Studies, Computer Science, and Biology, 2004 - 2008

Experience

FIX Analyst at FolioDynamix
April 2010 - Present (6 years 4 months)

- On-board and maintain FIX connectivity and trade messaging formats utilizing Radianz, VPN, direct connect, XML, and SFTP
- Enable asset managers & bank trust/sponsors (trade execution, clearing, & custody) to communicate equity, option, mutual fund, trade allocation, and pre-compliance messaging via FIX, real-time XML web service & flat file messaging protocols
- Standardize trade interface deployment process (SQL Insert & Update / FIX Engine XML update) to decrease time to market
- Manage system enhancement development through full System Development Life Cycle (SDLC): requirements gathering, high-level system design, system integration, quality assurance testing management, and change management processes
- Provide level 2 production support to resolve trading issues with regards to both real-time and file-based trade formats via simultaneous investigation of logs across multiple UNIX servers in conjunction with SQL queries to determine root cause
- Develop and maintain custodial relationships to facilitate the understanding of business needs crucial to successfully deliver full-cycle trade communication, FIX certifications, advanced trade functionality, and trading interface enhancements
- Plan and execute long-term vision of FIX trading engine disaster recovery strategy through system migration and FIX infrastructure restructuring from Point-to-Point to Service Bureau model to consolidate FIX traffic and reduce overall cost

Managing Partner at Attis Capital
2009 - Present (7 years)

- Evaluate and seek accredited investors through bottom line and intangible impact analysis
- Review and approve all drafts of investor documentation and notices for consistency with investor policy statements
- Co-approve and verify the validity of all expenses related to seeking new capital

Business Analyst at CGI

July 2008 - July 2009 (1 year 1 month)
- Implemented multiple nascent proprietary technologies to integrate data between legacy budgeting and accounting systems as part of a system-wide efficiency enhancement billed to the City of New York in excess of $100 million
- Developed technical and financial expertise of New York City budgeting and accounting systems
- Interfaced with clients to elucidate enhancements and changes to the technical and functional aspects of the system
- Provided technical solutions to the development team via the creation and execution of detailed test scripts

Product Manager / Business Analyst at   N-hega
February 2006 - February 2008 (2 years 1 month)
- Gathered and analyzed the unique business requirements of high-profile couture clientele to create enterprise recommendations to the directors of software engineering, marketing, and business development divisions
- Commissioned with the responsibility for the conception, development, and dissemination of key marketing materials, white papers, product manuals, and virtual product tutorials to diversify, and increase customer base density
- Provided comprehensive coverage and issue resolution for vital messaging, web, hardware, and software platforms
- Established diagnostic protocols to facilitate software and hardware defect resolution and development

Corporate Investment Banking IT Summer Analyst at   Citigroup
June 2007 - July 2007 (2 months)
- Improved workflow by implementing best-practice policies via first-hand analysis of over 500 client requests
- Appointed as team lead and consistently exceeded executive expectations on several time-sensitive projects
- Assured established protocols were adhered to throughout the software development life cycle
- Identified, audited, and resolved inconsistencies in hardware and software deployments and processes

Instructor (Princeton University) at   Internal Drive
July 2005 - August 2005 (2 months)
- Adapted pace, difficulty, and teaching methodology dependent on each student's individual abilities and interests
- Led and maintained student community given the company-wide best performance rating of all 50 campuses
- Inculcations: Programming & Robotics, Video Game Modification, and Video Game Creation

Information Systems Intern at   CentraState Healthcare System
June 2004 - August 2004 (3 months)
- Provided technical support to physicians and healthcare personnel on-site and remotely (Real VNC)
- Coordinated the resolution of operating systems (Windows 2000) and clinical software issues

• Resolved hardware and networking issues with established guidelines and technical protocol

Tutor at Kumon

February 2000 - August 2003 (3 years 7 months)

- Tutored children K-12 in mathematic topics ranging from basic addition through pre-calculus
- Graded sample problem sets and provided feedback to students to gauge level of understanding
- Encouraged students to challenge themselves with material far beyond the level taught in school
