WORK EXPERIENCE

Web developer
Freelancing - 2009 to Present

I have developed many websites using PHP/MySQL with some Ajax technology.

Programmer / Web
Freelancing - Damascus - 2010 to 2013

RUNNET is one of the biggest ISPs (Internet Service Providers) in Syria, I have served as web developer for about 3 years, which I improved my skills there.

Responsibilities:
• Full life cycle of the web applications development.
• Analyzing, designing, coding and debugging web applications using PHP & MySQL.
• Testing and validating work produced as part of the development process.
• Manage the development and training of the Content Management Systems.
• Perform maintenance programming and correction of identified defects.
• Integrate software with existing systems.
• Monitoring website technical performance.
• SMS services management.
• Working with a multi-disciplinary team to convert business needs into technical specifications.
• Working with designers, Front End and project management staff to capture requirements for the functional elements of website projects.
• Integrating websites with social networks (Facebook – Twitter …)

Projects
• ERP system which consists of:
- Local management system.
- ADSL customer management (Internal web application to manage ISP customers, reducing the paper work and automating the ADSL order process).
- Reporting system.
- Ticketing system.
- Users and permissions management system (role and user level).
• Websites:
http://www.runnet.sy
http://standsworld.com/
http://hseworld.net
http://www.consultationteam.net
http://tareksaada.com/
http://fallouh.net/
http://latakiacc.org

• Web application to manage GSM modem and other web services.

Key skills and competencies
• Ability to multi-task, react quickly to shifting priorities and meet deadlines.
• Proactive, confident and with a positive "can-do" attitude.
• Able to clearly communicate technical data to non-technical colleagues and clients.
• Continuously monitoring technologies and standards.
• Excellent attention to detail both front and back end.
• Solid web development experience using OOP, PHP, AJAX especially with the help of jQuery, MySQL, JavaScript, XML, HTML and CSS, Drupal CMS, Drupal eCommerce.
