WORK EXPERIENCE

Android Developer
Freelance

Responsibilities
Worked with customer from Upwork.com freelance platform, communicated and scoped requirements, analyzed architecture and developed native android applications.

Accomplishments
● Developed Llingo and VocLab, native android applications for learning different languages, that were installed over 500,000 times, (https://goo.gl/5fTiw5).
● Created package of apps Phrasepack (https://goo.gl/usj7n1) for learning and constructing phrases; added a quiz for memorization of vocabulary words.
● Used Google In-app Billing service and SQlite database to improve performance of apps and increase count of downloads.

Android Developer
EffectiveSoft - August 2014 to November 2015

Responsibilities
Developed and supported multiple applications for Android OS; communicated with engineers, QAs, users and management in order to satisfy customer requirements.

Accomplishments
● Worked on the Calculator Plus, top android calculator in google play with over 30'000'000 installations, and CALCU Stylish Calculator that has over 4'000'000 installations (https://goo.gl/9e69bk, https://goo.gl/OQAdSA):
○ Integrated new and improved existing in-app advertisement networks to increase revenue.
○ Developed new features, i.e. editing evaluations and inserting evaluations from history.
○ Implemented and supported multi-window mode for Samsung devices.
○ Participated in testing, debugging and bug fixing processes.
● Developed an app for tracking work order for Belron company.
○ Created application UI based on mock ups and used native android tools.
○ Implemented UI screens that can be dynamically configured on the server.
○ Coded interactions with web services, databases, push notification and printing SDK.

Android Developer

Itransition - August 2012 to August 2014

Responsibilities
Developed android applications based on customer requirements. Was involved with entire software development cycle for multiple projects: requirement specification, design, implementation, testing and maintenance.

Accomplishments
● Created Wardflex Jobsite Assistant (https://goo.gl/osl8bB), GlobalMoney (https://goo.gl/vOkqRV), LuckyText(https://goo.gl/ThkxXC) and more.
○ Worked with geo location, JSON/XML parsing, asynchronous tasks, custom adapters, custom views, canvas and bitmap manipulation, fragments.
○ Transformed specification documents into a functioning app.
○ Supported the entire mobile application through its lifecycle.
