Austin, TX - Email me on Indeed: indeed.com/r/Jkjones-Dev/6cad667a5cbf5ebf

Willing to relocate: Anywhere
Authorized to work in the US for any employer

WORK EXPERIENCE

Android Developer (Intern)

Byte   -   Austin, TX - August 2015 to Present

Responsibilities
I work on bug fixes and feature addition to the Android platform of the Byte application. I work as part of a very small team to create and maintain a startup app food service with integrated purchasing, geo-fencing, and restaurant profiling.

Accomplishments
I have had the major opportunity to work as a part of a professional team working on a real-time project that directly goes out into the hands of hundreds of users daily.

Skills Used
During my work I use Java programming and develop within Android Studio for the application. I use git version control to coordinate and work with the small team to simultaneously work on multiple portions of the application at a time.

EDUCATION

Pursuing Bachelor's in Computer Science

University of Texas at Austin   -   Austin, TX
2014 to 2018

SKILLS

Java (2 years), Git (1 year), Android (1 year), C (1 year), Linux (2 years), HTML (1 year), CSS (1 year), Photoshop (6 years), Indesign (5 years), Illustrator (5 years), Graphic Design (6 years)

June 2015

I created CheaterCheater as a simple, clean, and easy to use multipurpose word game helper application for Android.

CheaterCheater helps find all word combinations word game hands including on board pieces, solve Scrabble, Words With Friends and many other popular word games with this easy to use app! CheaterCheater also contains a dictionary look up, so if you're playing a game of Scrabble and someone else plays a word, you can immediately check that word on the current dictionary!

CheaterCheater uses the open source ENABLE word list to give you the most viable word game words possible, and unlike many other word game helpers, CheaterCheater does this without any internet connection!
