WORK EXPERIENCE

Android Developer

Entiresoft Technologies - May 2014 to March 2015

Project 1: News aggregator app.
Anchored the mobile development team for this reputed software company. Worked with an efficient group of developers to create a Newspaper app, which mobilized multiple newspapers in a single touch .This application consists of many major daily newspapers from various Indian regional languages as well as few foreign languages. Based on language all newspapers are listed on a side menu so that users can easily select and read on a single touch.

Tasks and responsibilities
• Conceptualized, designed, developed and deployed mobile applications.
• Developed using Eclipe IDE
• Researched application acceptance and solicited feedback from users to boost adoption rates
• Wrote technical specifications and maintained all reports pertaining to application development process
• Communicated effectively with stakeholders to manage expectations
• Tested the application on various mobile devices including tablets and android phones.
• Designed applications for all types of screen sizes and orientations.
• Integrated google play services.

Project 2: Film review application
This application was built on IOS platform and contains all the updated film news and reviews. It also consists an option for users to select different categories of information related to films.

Tasks and responsibilities
• This application is iPhone compatible, and was designed and implemented using iPhone SDK, X-Code, Objective-C and Interface Builder.
• Integrated json parsing techniques and other objective c methods.
• Excelled in application concept development and wire framing using xCode's Storyboard
• Coordinate with designers and other developers to complete projects.

Android Developer
PortLeaf Technologies - May 2012 to April 2014

Responsibilities
• Assist team in application Design and Analysis.
• Wrote technical specifications and maintained all reports pertaining to application development process
• Communicated effectively with stakeholders to manage expectations
• Tested the application on various mobile devices including tablets and android phones.
