John Park

Full Stack Web Developer

Lorton, VA - Email me on Indeed: <u>indeed.com/r/John-Park/80170bb9f008c7e0</u>

Full Stack Web Developer looking to add maximum impact to your agile development team. Learns quickly and works incredibly well in a team, but also has the initiative and resourcefulness to find solutions on my own. Would love to schedule a time to learn more about your company. Let's chat!
Authorized to work in the US for any employer

WORK EXPERIENCE

Web Developer

General Assembly - Washington, DC - 2015 to 2016

Created a crowdsourced Ruby on Rails app that pairs travelers with users offering lodging for a fee. Integrated full CRUD functionality.
* Designed and developed a crowdsourced Ruby on Rails web app that matches pet owners with pet sitters. Styled with Bootstrap.
* Formulated and coded a crowdsourced AngularJS app that pairs small jobs with other app users for an agreed upon fee through messaging.
* First project included a memory game using HTML, CSS, and jQuery.
* Served as a project manager, gathering requirements and ensuring each project was delivered on time, and exceeded expectations.

Sales Operations Manager

mPortal Inc - McLean, VA - 2014 to 2015

Increased revenues by improving overall operations, including the development of sales meetings to discuss new business opportunities, customer retention strategies and ways to excel at client relations.
* Managed and maintained detailed sales forecast reports in Salesforce for corporate usage.
* Increased leads by proactively researching and qualifying opportunities for the Strategic Accounts department.

Sales Executive

Vocus Inc - Beltsville, MD - 2010 to 2013

* Promoted twice in only 2 years due to outstanding performance - exceeded quota by > 150% in 6 of 9 quarters.
* Played a key role in the creation of an internal promotion process and mentorship program for new executives.
