Hugo Buriel-Vasquez
Web Developer with focus on Front-End Development who prefers to Telecommute

Riverside, CA - Email me on Indeed: indeed.com/r/Hugo-Buriel-Vasquez/127228d1b2cc27bb

Web Developer with experience in front-end technologies, LAMP stack, WordPress platform, and a working knowledge of Java game development (e.g. Minecraft) & Python. I develop custom applications, content management systems, upgrade and maintain projects for small businesses, corporations, and private individuals. I'm an avid health and fitness enthusiast and would like to branch out into these industries to build apps and sites.
Authorized to work in the US for any employer

WORK EXPERIENCE

Web Developer
Mercy For Animals   -   Los Angeles, CA - January 2016 to July 2017

♣ Responsible for development, maintenance, and improvement of MFA websites, web applications, and general IT support
♣ Created and updated web pages and applications written in PHP, HTML, CSS, and JavaScript
♣ Implemented various APIs from social media networks and third-party vendors
♣ Conducted quality assurance testing on MFA sites and web applications
♣ Deployed builds to development and staging environments using Git and GitHub
♣ Developed WordPress plugins, themes and back-end user controls

CMS Developer
Myers Media Group   -   San Diego, CA - 2014 to 2016

Responsibilities
-Modified and maintained large, data-driven, high-traffic web sites
-Implemented complex CSS designs and HTML graphic user interface (GUI) elements from design mock-ups.
-Used Bootstrap to implement responsive design functionality or update branding/look and feel design elements on existing sites .
-Developed WordPress plugins, themes and back-end user controls from scratch to add new functionality that is portable across different websites.
-Developed and modified highly customized WordPress themes.
-Migrated & cloned large WordPress sites modified to accommodate new client specifications, including copying back-end internal databases and any custom auxiliary tables used.
-Migrated all sites from small hosting company to AWS.
-Implemented schema, microdata, and structured data techniques for SEO benefits.
-Developed JavaScript modules that offer rich client-side interactions and aggregate API data using concepts presented by UI designer.
-Troubleshooted and fixed bugs in a complex application framework.
-Used MySQL, performed data insertion, updates, and corrections.
-Managed bug reports and makes fixes to existing functionality.
-Pushed and QA'd changes to code on development and staging servers.
-Provided code reviews with team members.

ADDITIONAL INFORMATION

SKILLS & TECHNOLOGIES

FRONT END - Semantic, standards-compliant, progressive enhancement, graceful degradation, responsive:
• HTML 4.01, XHTML 1.0/1.1, HTML5, XML, XSLT
• CSS 2.1, CSS3, LESS, SASS, SCSS
• JSON, BSON
• JavaScript, React, jQuery, MooTools, Backbone.js, Underscore.js, Handlebars.js, Require.js, Raphael.js, Leaflet, Twitter Bootstrap, Zurb Foundation, Spine.js
• Cross-browser compatibility including legacy browser versions such as IE 6/7/8 and of course 9/10+
• OpenGL / WebGL
• Bourbon / Neat
• Gulp / Grunt

BACK-END
PHP, Python, Java

SCRIPTING LANGUAGE:
PHP 5.2, 5.3, 5.4+; Java 6/7

DATABASE:
MySQL, MongoDB

SERVER:
Zend Server CD, CentOS

HOSTING EXPERIENCE:
Managed: VPS.NET, Rackspace, Linode, Slicehost
Shared: Dreamhost, Bluehost, GoDaddy, HostGator, Aplus

APIs - Installed, modified, and created interfaces for these APIs:
REST, HTML5 APIs (e.g. Geolocation, File, Media, Drag&Drop), Amazon AWS (e.g. S3), MailChimp, Flickr, Vertical Response, Constant Contact, Google Maps, Cufon, StackExchange, Facebook, Twitter

COMMUNICATION PROTOCOLS:
HTTP, FTP, SFTP, TCP/IP, SMTP, POP, IMAP

VERSIONING SYSTEMS:
Git, SVN, CVS, SmartGit, TortoiseGit, TortoiseSvn

DEVELOPMENT IDEs & TEXT EDITORS:
KomodoEdit (favorite), SublimeText2, Eclipse, NetBeans, Notepad++, Programmers Notepad, PhpED, MySQL Workbench

GUIs:
Database: HeidiSQL, Navicat, MySQL Workbench
Shell: PuTTy, Cygwin
Versioning: SmartGit, TortoiseGit, TortoiseSvn

DESIGN SOFTWARE:
Photoshop
